

Triple Eight's Pocket Tools Gets Media Attention at S.H.O.T.

San Diego, CA: Triple Eight Professional's new line of compelling Pocket Tools caused a stir at the international Shooting and Hunting Outdoor Trade Show in Orlando, FL. Here, photographers from the world-class Japanese gun magazine "GUN" set up their "mobile" photo studio at a press conference to photograph the Triple Eight Pocket Tools!

"We've never seen anything like this!" they exclaimed. "Our readers will be excited to see these new ideas and they are definitely going into our 'Best things we saw' at the SHOT show report!"

The buzz continued after the show, with Triple Eight's e-mail jammed with requests from editors and writers for samples, photos and more details about future products. Look for write-ups on Triple Eight's products in a wide range of national media sources in the near future.

We're scrambling to keep up with orders after word got out to the shooting public after the S.H.O.T. show through bloggers and word of mouth, but rest assured, more product is arriving daily and we can handle future orders easily! While many in the industry are behind and supplies are dried-up, Triple Eight planned ahead and we're ready to deliver!
